RESUME

JUTHAWAT JUNGRAKHANGTHONG

DEVELOPER

ABOUT ME

4th-year Computer Engineering student at RMUTK with hands-on experience building web apps end to end, from frontend to database and deployment. Interested in full-stack development and practical AI/automation. Looking for an internship where I can ship real features.

SKILLS

- **Frontend**: HTML, CSS, JavaScript, React, Next.js, TailwindCSS
- **Backend & DB**: Express, Node.js, NestJS, MySQL, PostgreSQL, MongoDB
- **Tools**: Docker, Git, GitHub, Vercel, n8n, LINE OA

LANGUAGE

- Thai (Native)
- English (B1)

Portfolio

EDUCATION

Rajamangala University of Technology Krungthep – 2022-2026
B.Eng. Computer Engineering and IoT Systems · GPA 3.17

PROJECTS

Mini Jira · mini-jira-tan.vercel.app

- Issue tracker with GitHub and Google sign-in, deployed on Vercel
- Integrated n8n to send LINE notifications on issue events

Pomodoro PWA (Capstone) · HTML, CSS, JavaScript, Firebase

- Progressive Web App with focus modes for users with ADHD (Mini-Pomodoro, Movement, Reward)
- Refactored monolithic code into ES modules; secured data with Firestore Security Rules

LINE → Google Drive Automation · n8n, LINE OA

- Workflow that automatically saves files sent via LINE to Google Drive

Recycling Points Web App

- Web app where users earn points for sorting waste / returning bottles; built the frontend pages and connected it to Firestore
